

# Are you joining us at the Open Source, Open Society conference?

Learn how technology and open ways of working can transform your work, your organisation and our society.

## Two huge days of inspiration, professional development and connecting

### Open your thinking

Be inspired by global champions who are pioneering a more open world. Learn from the people ripping the lid off huge questions and leading NZ forward.

### Connect and create

Join over 400 practitioners and innovators in facilitated collaborative sessions. Expect to contribute and connect with others.

### Level up your skills

Change the landscape of your work, your team, your organisation, our society with three streams of professional development workshops.

*An open world is more transparent, participatory and collaborative. Being open means we all have more freedom to innovate and improve our society. Learn from leaders in this work at OS//OS.*

*Put the power of participation and collaboration into action.*
